

JUNGUANG JIA

junguang.jia@columbia.edu ◇ junguangjia.github.io

EDUCATION

Columbia University

Sep 2025 – Present

Master of Arts in Statistics (Theory and Methods Track)

University of California, San Diego

Sep 2020 – Jul 2024

Bachelor of Science in Mathematics (Probability and Statistics)

- Provost Honors (multiple quarters).
- Exchange Program: Fudan University, Probability & Statistics

Aug 2022 – Jun 2023

SELECTED COURSEWORK

Ph.D.-Level Coursework — Columbia University

Computational Statistics (STAT GR6104)

Probabilistic Models and Machine Learning (STCS GR6701)

In progress

Optimization I (IEOR E6613)

In progress

Advanced Statistics — Columbia University

Honors Probability Theory

Honors Statistical Inference

Honors Linear Regression Models

Bayesian Statistics

Stochastic Processes – Applications I

Time Series Analysis

Unsupervised Learning (in progress)

Mathematics — UC San Diego

Introduction to Analysis II

TECHNICAL PROJECT EXPERIENCE

ArtVenn – Content & Community Platform

2026 – Present

Founder & Technical Project Lead

Development / Pilot

- Directed AI-assisted development of a TypeScript monorepo integrating a Next.js/React web client, Node.js HTTP services, and a PostgreSQL-backed content catalog.
- Defined shared runtime-validated schemas and OpenAPI contracts; separated public API responses from private source data, storage credentials, and backend persistence.
- Built data-import and editorial workflows with dry runs, transactional writes, idempotent replay, versioned drafts, and controlled publication.
- Implemented text normalization and PostgreSQL search with ranked results, deterministic pagination, and query-regression tests.
- Prepared cloud infrastructure using virtual machines, managed PostgreSQL, private object storage, Nginx, and TLS; validated data migration, backups, and isolated database restoration.
- Coordinated AI-assisted implementation, debugging, and independent review through Git worktrees, GitHub Actions, unit/integration tests, and Playwright browser acceptance.

WORK EXPERIENCE

Mobalytics

Jul 2023 – Sep 2023

Data Analyst, Data Department

California, USA

- Analyzed demographic and player-behavior data across three games to study engagement and personalization opportunities.
- Cleaned and prepared data using SQL; applied correlation and regression analysis to price, score rank, and ownership metrics.
- Created Tableau visualizations and player-segmentation analyses; translated findings into recommendations for the marketing team.

Shanghai Dingbang International Trading Co., Ltd.

Sep 2022 – Dec 2022

Financial Assistant, Production Statistics Department

Shanghai

- Maintained production-statistics records and source documentation; distributed report preparation across regular intervals to reduce end-of-period workloads.
- Compiled daily production reports to track changes and identify deviations; managed employee salary settlements.

Hua An Securities

Jul 2022 – Sep 2022

Investment Research Analyst, Investment Research Department

Shanghai

- Conducted company and industry analysis in the catalyst sector, synthesizing company information, market data, and industry trends.
- Applied multiple linear regression and principal component analysis to interpret market dynamics and support investment recommendations.

Shanghai Yunyi Huan Yu Technology Co., Ltd.

Jun 2021 – Aug 2021

R&D Assistant, Data Analysis Department

Shanghai

- Supported data integration, model analysis, and validation using Python and Spark for O2O and SaaS platforms.
- Contributed data processing, verification, and technical coordination to a SaaS platform serving small and medium-sized enterprises and e-commerce businesses.

TECHNICAL SKILLS

Programming

Python, R, SQL, Julia, TypeScript

Web & Data

React, Next.js, Node.js, PostgreSQL, Apache Spark

Cloud & DevOps

AWS (database services), Docker, Linux, GitHub Actions

Tools

Git, Tableau, L^AT_EX
